Description
Efficient Market Advisor’s ESG 20 Plus Years Strategy provides a solution for investors who are in excess of twenty years from needing to begin spending their investment. The Strategy’s main objective is to achieve a balanced return by investing in a combination of asset classes. The Strategy consists of multiple exchange-traded funds (ETFs) that incorporate Environmental, Social and Governance (ESG) factors. The ESG 20 Plus Years Strategy is designed for investors willing to accept a high level of volatility in their portfolio.

Blended Expense Ratio (3) 0.17

Environmental, Social and Governance (ESG)
Environmental, Social and Governance (ESG) criteria refers to three main factors investors consider with regards to a firm’s ethical impact and sustainable practices. The criteria used in ESG investing are also sometimes referred to as sustainable, responsible and impact investing.

- Environmental criteria look at how a company performs as a steward of the natural environment.
- Social criteria examine how a company manages relationships with its employees, suppliers, customers, and the communities where it operates.
- Governance deals with a company’s leadership, executive pay, audits, internal controls, and shareholder rights.

Examples of ESG criteria used by investors include determining a company’s impact on climate change or carbon emissions, water use or conservation efforts, anti-corruption policies, board diversity, human rights efforts and community development.

Disclosures

Efficient Market Advisors, a business of Cantor Fitzgerald Investment Advisors, L.P. (EMA) claims compliance with the Global Investment Performance Standards (GIPS) and has prepared and presented this report in compliance with the GIPS standards. EMA has been independently verified for the periods November 1, 2004 through September 30, 2019. Verification assesses whether (1) EMA has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis, and (2) EMA's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Cantor Fitzgerald Investment Advisors, L.P. acquired Efficient Market Advisors, LLC on February 28, 2017 to form Efficient Market Advisors a business of Cantor Fitzgerald Investment Advisors, L.P. (EMA). Prior to being acquired, Efficient Market Advisors, LLC was an independent, SEC-registered investment advisor. Cantor Fitzgerald Investment Advisors, L.P. is an SEC-registered investment advisor.

EMA constrains investment portfolios using Exchange-Traded Funds (ETFs). Founded in 2004 for the sole purpose of managing ETF based separate accounts, EMA serves high net-worth investors, trusts, foundations, retirement plans and institutions. EMA has one of the longest pure-ETF investment track records in the investment management industry. EMA utilizes proprietary and third-party research to construct ETF portfolios that offer investors highly-diversified asset class exposure that is transparent, liquid, low-cost and tax-efficient. EMA's mission is to deliver superior investment returns over full market cycles through the implementation of properly asset allocation processes.

Asset allocation and diversification strategies do not protect against market risk or loss of principal. Neither do these strategies assure a profit nor do they protect against losses in declining markets. Investments in managed portfolios have additional management fees and expose the investor to the risks inherent within the portfolio and the specific risks of the underlying funds directly proportionate to their fund allocation. Investing involves risk, including the loss of principal. Investment returns, particularly over shorter time periods, are highly dependent on trends in the various investment markets. Investors should consider the investment objectives, risks, charges and expenses of the underlying funds that make up the managed portfolios carefully before investing. Information regarding the underlying funds held in client accounts is outlined in the investment's prospectus which should be read carefully to fully understand the total amount of fees being paid and other risks. EMA does not receive any of the fees charged by the underlying funds. Further information on the fees received by EMA is outlined in our Form ADV Part 2A Disclosure Brochure which can be found at [https://www.adviserinfo.sec.gov](https://www.adviserinfo.sec.gov).

The composite benchmark is a blend of 74% MSCI All Country World Index, 18% Barclays US Aggregate Bond Index, 6% HFRX Global Hedge Fund Index and 2% Barclays US 1-3 Month Treasury Bill Index. The blended benchmark is calculated daily and rebalanced monthly.

MSCI All Country World Index (ACWI): A free float-adjusted market capitalization-weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 46 country indices comprising 23 developed and 23 emerging market country indices.

Barclays US Aggregate Bond Index: A broad-based, market capitalization-weighted benchmark that measures the investment grade, US dollar denominated, fixed rate taxable bond market, which includes Treasuries, government related and Corporate securities.

HFRX Global Hedge Fund Index: The HFRX Global Hedge Fund Index is designed to be representative of the overall composition of the hedge fund universe. It is comprised of all eligible hedge fund strategies; including but not limited to convertible arbitrage, distressed securities, equity hedge, equity market neutral, event driven, macro, merger arbitrage, and relative value arbitrage. The strategies are asset weighted based on the distribution of assets in the hedge fund industry.

Barclays US 1-3 Month Treasury Bill Index: Includes all publicly issued zero-coupon US Treasury Bills that have a remaining maturity of less than 3 months and more than 1 month, are rated investment grade, and have $250 million or more of outstanding face value. The securities must be denominated in US dollars and must be fixed rate and non-convertible.

Indices: Indices are unmanaged, do not incur management fees, costs and expenses and cannot be invested in directly.

Standard Deviation: A measurement of dispersion about an average, depicting how widely a stock or portfolio’s returns varied over a certain period of time. When an investment or portfolio has a high standard deviation, the predicted range of performance is wide, and implies greater volatility.

Alpha: The return on an asset in excess of the asset’s required rate of return.

Beta: The measure of an asset or portfolio's sensitivity to the market as a whole. A beta above 1 is more volatile than the market while a beta below 1 is less volatile.

Sharpe Ratio: The average return in excess of the risk free rate divided by the standard deviation of return. It is a measure of the average excess return earned per unit of standard deviation of return.

Max Drawdown: The decline from either the initial investment or the highest appreciated value to the lowest investment value. For example, a portfolio with $100,000 in assets that declines in value to $75,000 would have a 25% drawdown.

Months to Recover: The number of months that it takes an investment to return from its lowest amount to the highest appreciated value of the invested assets.

Past performance is not indicative of future results, and there can be no assurance, and clients should not assume, that future performance of any EMA managed portfolios will be comparable to their past performance. Investment returns and principal value will fluctuate, so that investors’ shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited.

Actual client results are impacted by start and end dates, withdrawals, additional deposits, and any charges imposed by the investment custodian, which may materially affect client performance returns. Investing may involve risk including loss of principal.

A portion of the data and information contained in this fact sheet have been obtained from various sources believed to be reliable. However, EMA does not guarantee the accuracy of such data and information.

This fact sheet is being provided for informational purposes only. It should not be considered investment advice and investors should not make investment decisions based solely on the information in this fact sheet. The performance numbers reported are not a solicitation to buy or sell securities, and there is no claim to the suitability of the investment strategy for any individual. Securities prices may vary dramatically over time and results will vary due to changing economic or market conditions.
